

The powerful tool to sell highly individualized products via internet.

If your products are too complex for sales and marketing via a conventional online shop, we enter the scene.

Make use of our web service and support to offer your customers to carry out individual configuring of your products – simple and seamless on your present web page.

Look and see our services on our web page www.allpccloud.com.

Highlights

- Flexible, universal data base – can be applied to every kind of product
- Fully web based – User interactions via browser, frontend embedding on your web page seamless via JavaScript API – no software installations required, responsive (desktop and mobile)
- Multi language– Label texts can be supplied in arbitrary translations
- Sales tool – Bills of materials and top-down-price calculation, acquisition of client data under the rules of the GDPR, Generation of offers and invoice documents
- CAD-engineering-functionality – With our powerful script language user input can immediately be integrated in the online design process, even to generate and visualize 3d CAD models (STEP) in the browser.
